CORE COMPETENCIES

- Content Operations
- Data Validation & Cleaning
- Process Automation
- Content Migration
- Data Integrity & Security
- Cross-functional Collaboration
- Product Launch Support

TECHNICAL SKILLS

DATA & ANALYTICS

- Advanced Microsoft Excel
- Pivot Tables & Filters
- VLOOKUP / XLOOKUP
- Data Validation
- Data Visualization
- Google Sheets

PROGRAMMING & QUERY

- SQL (Basics)
- Python (Basics)
- VBA (Basics)
- HTML & CSS

AI & AUTOMATION

- ChatGPT & Gemini
- Perplexity & Anthropic AI
- Prompt Engineering
- AI Agents (Basics)
- Workflow Automation

EDUCATION

B.Tech (Graduated 2022)

PVKK Institute of Technology
Anantapur, Andhra Pradesh

PROFESSIONAL SUMMARY

Results-driven Marketing Operations and Data Operations Analyst with 3+ years of experience in content operations, data validation, automation, and digital content migration. Skilled in Excel, VBA, SQL, CMX, AEM, and AI-assisted workflows. Currently expanding expertise in Python, AI agents, and data analytics to drive business insights and operational efficiency.

PROFESSIONAL EXPERIENCE

Dell Technologies

Aug 2025 – Present

Analyst, Marketing Operations

- Managed end-to-end product data operations and content delivery for monitors, keyboards, docks, and accessories.
- Utilized SQL queries to extract, validate, and feed product data into Content Pages, ensuring accurate and timely content updates.
- Developed and utilized VBA automation scripts to streamline data processing tasks, improve efficiency, and reduce manual effort.
- Worked on the Content Augmentation Bot (CAB) project to identify and rectify AI-generated content errors, improving the quality and accuracy of SEO titles, product descriptions, and bullet points.
- Worked on product launches by ensuring content readiness and supporting timely publication of products across digital platforms.
- Collaborated with cross-functional teams to streamline content management processes and improve operational efficiency.

IndiVillage Tech Solutions

Dec 2022 – Aug 2025

Sr. Data Processing Analyst

- Processed, transformed, and validated large-scale CSV datasets with high accuracy to support global client operations in AI and Machine Learning domains.
- Developed automated data processing and formatting workflows using VBA and Excel, significantly cutting down manual effort and improving operational speed.
- Established and maintained secure data handling protocols, encryption standards, and compliant file transfer processes to preserve strict data integrity and information security.
- Collaborated directly with stakeholders to align technical data delivery with core business requirements under rigid project timelines.
- Applied advanced AI tools and prompt engineering capabilities to streamline daily production workflows and support data-driven decision-making.
